SEA-CELL 200

A QUALITY FORMULATION OF SEAWEED EXTRACT, PLANT OILS, AND NUTRIENTS

GENERAL INFORMATION: Sea-Cell 200 is a liquid fertilizer formulated to boost plants during critical growth periods and to correct NPK deficiencies. It promotes seed and root development along with strong cell structure when used as a supplement in a soil fertilizer program. When used in a foliar program, it is absorbed through leafy tissue and can be translocated where needed. N, P and K are crucial for seed development, root, and cell structure. It is non-phytotoxic and is compatible with most elements.

SUGESSTED USE

FIELD CROPS AND PERINEALS CROPS: Apples, Artichokes, Avocados, Blackberries, Broccoli, Brussel Sprouts, Cabbage, Carrots, Cauliflower, Celery, Citrus, Corn, Cotton, Deciduous Fruit, Eggplant, Grain Crops, Grapes, Kiwi, Lettuce, Melons, Nut Trees, Onions, Peas & Beans, Peppers, Pomme Fruits, Potatoes, Raspberries, Spinach, Squash, Strawberries, Tomatoes, Turf Grasses, Vineyards, Watermelon – Application Rate: For both soil and foliar sprays; mix 8 to 16oz per acre, starting at emergence or bud break and continuing every 10 days until 15 days prior to harvest diluted in 50 gallons per acre of water. When using with grape coloring spray applications, add 10oz of Sea-Cell 200 per acre. Compatibility – Sea-Cell 200 should be jar tested

continuing every 10 days until 15 days prior to harvest diluted in 50 gallons per acre of water. When using with grape coloring spray applications, add 10oz of Sea-Cell 200 per acre. **Compatibility** – Sea-Cell 200 should be jar tested and/or field tested in a small area to observe potential phytotoxicity before application. For best results, buffer all tank mixes to a final pH of 6.0-7.0. When tank mixing this product with pesticides requiring specific pH ranges, always follow pesticide label directions.
